## EDUCATION

---

### Boston University

Boston, MA

Bachelor of Arts in Computer Science and Mathematics - GPA: 3.5

2022 - 2026

- Coursework: Advanced Calculus, Linear Algebra, Computer Systems, Probability in Computing, Applied Statistics, Algorithm/Data Structure Analysis, Database Design, Artificial Intelligence, System Design
- Certifications: IBM Data Analyst Professional Certificate; FreeCodeCamp Web Design Certificate; Udemy Modern JavaScript Certificate

## EXPERIENCE

---

### Freelance Web Development

Remote

Full-Stack Developer

Oct. 2025 – Present

- Engineered full-stack responsive application for Written Exposure using React, Tailwind CSS, and Node.js, delivering project ahead of schedule through Agile development sprints.
- Architected RESTful APIs and integrated MongoDB database, optimizing load times with indexing strategies.
- Collaborated with clients to discuss and iterate on UI/UX designs, currently implementing more features.

### Boston University

Boston, MA

Academic Tutor

Sept. 2025 – May 2026

- Deliver personalized instruction to 15+ students in Calculus, Statistics, Data Structures, and Algorithm Design.
- Develop customized learning materials and coding exercises, adapting teaching methodology to students of diverse learning styles and international backgrounds.

### Lavner Education

Garden City, NY

Technical Instructor

Jun. 2025 – Aug. 2025

- Managed student roster database, performing data entry and organization to improve administrative efficiency.
- Instructed 130+ students in Python, Java, and Lua, delivering curricula to enhance project-based learning.
- Resolved network and server-side technical issues for 100+ camp laptops, maximizing instructional uptime and ensuring a seamless learning environment.

## PROJECTS

---

### Stock Market Prediction Tool

Nov. 2023

Python, Pandas, Matplotlib, Sympy

- Developed linear regression models using Python and Pandas to perform time-series analysis on historical market data, processing 10,000+ data points.
- Achieved 85% prediction accuracy by engineering features from stock indicators and leveraging Matplotlib and Sympy to visualize patterns and backtest results.

### Spotify Recommendation Engine

Feb. 2024

Python, SciPy, Flask Framework

- Extracted and analyzed features from Spotify API, utilizing SciPy algorithms to generate music recommendations.
- Optimized recommendation algorithm through A/B testing, reducing generation time by 45% while increasing user engagement metrics.

## EXTRACURRICULAR ACTIVITIES

---

### Harvard HDSI Hackathon

Oct. 2024

Competitor

- Collaborated in cross-functional team of 4 to analyze impact of aging farmer demographics on U.S. agriculture, presenting data-driven insights to industry judges within 48-hour timeframe.
- Processed and visualized 50,000+ census records from CSV and XML datasets using Pandas, Seaborn, and Plotly.
- Delivered compelling presentation leveraging interactive dashboards and statistical modeling, demonstrating strong communication and teamwork under tight deadlines.

## TECHNICAL SKILLS

---

**Programming Languages:** Python, Java, JavaScript (React), C, C++, HTML, Swift, R, Rust, SQL, Go

**Tools and Libraries:** Pandas, NumPy, Matplotlib, Sympy, Seaborn, Plotly, SciPy, Apache Airflow, Azure

**Software & Methodologies:** Git, Microsoft Office Suite, Tableau, LaTeX, Agile/Scrum, CI/CD, RESTful APIs
